**Global Software Corporation Attains Gold Certified Partner Status
In Microsoft Partner Program**

*Global Software Corporation Further Distinguishes Itself by Earning Microsoft Competencies
In ISV/Software Solutions and Networking Infrastructure Solutions*

Oklahoma City, Oklahoma, U.S.A. — March 10, 2006 — Global Software Corporation, Solutions for a Secure Community, today announced it has attained Gold Certified status in the Microsoft Partner Program with competencies in ISV/Software Solutions and Networking Infrastructure Solutions, recognizing Global Software's expertise and total impact in the technology marketplace. As a Gold Certified partner, Global Software has demonstrated expertise with Microsoft technologies and proven ability to meet customers' needs. Microsoft Gold Certified Partners receive a rich set of benefits, including access, training and support, giving them a competitive advantage in the marketplace.

Global Software Corporation is a leader in technology innovation to empower the secure community. Across the United States, Global offers federal, state and local public safety agencies as well as Corporate America unparalleled technology solutions to ensure business and community security. Through a commitment to continuous innovation and forming strategic alliances, Global has evolved its core product suite to deliver proven and progressive applications for the Nation's homeland security requirements, including: integrated CAD & RMS, digital imaging, pin-mapping, crime analysis, field reporting, AVL, and web-based vehicle tracking and wireless mobile applications. From strategic assessment through training and

customer care, Global's full-service offerings are created to assure each customer's complete satisfaction.

"We are extremely pleased to have attained Gold Certified status in the Microsoft Partner Program. We have worked very hard throughout our organization to provide a suite of quality software solutions that meets the needs of our customers," said Jeff Pugh, Vice President of Operations. "The benefits provided through our Gold Certified status will allow us to continue to enhance the offerings that we provide for our Global customers."

"Customers are looking for partner companies that can bridge the gap between their business demands and technology capabilities. They need to trust in someone that can act as an expert adviser for their long-term strategic technology plans. Microsoft Gold Certified Partners, which have certified expertise and direct training and support from Microsoft, can build a positive customer experience with our technologies," said Allison Watson, vice president of the Worldwide Partner Sales and Marketing Group at Microsoft Corp. "Today, Microsoft recognizes Global Software Corporation as a new Microsoft Gold Certified Partner for demonstrating its expertise in providing customer satisfaction with Microsoft products and technology."

As one of the requirements for attaining Gold Certified Status, Global Software had to declare a Microsoft Competency. Microsoft Competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry.

The Microsoft ISV/Software Solutions Competency recognizes the skill and focus partners bring to a particular solution set. Microsoft Gold Certified Partners that have obtained

this competency have a successful record of developing and marketing packed software based on Microsoft technologies.

“Solutions Competencies are an important way for Microsoft to better enable ISVs to meet customer needs,” said Sanjay Parthasarathy, corporate vice president of the Platform Strategy & Partner Group at Microsoft. “They allow ISVs to keep and win customers with their deep knowledge of solutions-based Microsoft platform technologies. Microsoft has a long history of working closely with ISV partners to help deliver compelling solutions and applications to our mutual customers, and the Solutions Competencies are an important step in continuing to enhance vital relationships with ISVs worldwide.”

Microsoft Gold Certified Partners enrolled in the Networking Infrastructure Solutions Competency have proved their competency in implementing technology solutions based on either the Microsoft Windows Server™ 2003 or Windows® 2000 Server operating system, with a particular focus on Microsoft Small Business Server 2000 and Windows Small Business Server 2003. These implementations may include crafting solutions that connect Windows-based servers, PC locations and the Internet; installing a server farm; or building a small-business Windows Server stand-alone solution that includes file and print capabilities.

“We place tremendous value on our partners, who help us deliver solutions and applications to customers,” said Allison Watson, vice president of the Worldwide Partner Sales and Marketing Group at Microsoft. “Solutions Competencies provide an integrated partnering framework that recognizes an enterprise’s expertise and rewards it for the effect it has in the technology marketplace. It also allows companies to demonstrate for customers their knowledge of building solutions based on Microsoft technologies, such as setting up networks using Windows Server 2003 and Windows Small Business Server 2003.”

The Microsoft Partner Program was launched in December 2003 and represents Microsoft's ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners' businesses be successful.

About Global Software Corporation:

Founded in 1998 as "Global Dispatch Technology Corporation", the Company was formed to develop software products that automate processes for 9-1-1 dispatch. The Company's original core offering, a computer-assisted dispatch [CAD] product, was developed in close collaboration with public safety dispatch centers. The suite of products and services soon expanded through in-house technology development and business partnerships to position Global as a single-source provider of public safety needs for mid-tier cities and counties.

Today, the Company is established as Global Software Corporation. Global maintains headquarters and its development center in Oklahoma City, Oklahoma as well as regional offices in Texas, Kansas, Florida, New York, and Utah.
